Re: Administrative Order on Consent
Arkema Inc., West Plant Property
U.S. EPA ID NO. MID 005 363 114
U.S. EPA Docket No. V-W-89-R-45

Dear Mr. Wright,

Thank you for traveling to Chicago on May 19, 2010 with your consultants to provide an overview of site conditions at the Arkema, Inc. West Plant property and Site documents including the RFI and the CMS, to EPA staff at a project meeting in Chicago. One topic of discussion was groundwater conditions at the Site. EPA stated that some additional groundwater monitoring data was needed at wells identified in the EI as representing groundwater conditions which discharge to surface water, to support EPA's decision regarding the final remedy. Specifically, the following wells which monitor groundwater discharges to Monguagon Creek must have two additional rounds of samples taken during separate seasons: MW-016, MW-018, MW-019 and MW-217 (replaced MW-017).

Please provide EPA with your schedule for sampling these wells and the proposed analyte list.

If you have any questions, please contact me at (312) 886-3020.

Sincerely,

Carolyn Bury, Project Manager
Corrective Action Section 2
Remediation and Reuse Branch
